

SOITAAB IMPIANTI SRL, with many years of experience, believes in continuous technological development and the constant search for innovative cutting solutions, aiming to always achieve maximum levels of efficiency, precision, and speed.

SOITAAB IMPIANTI SRL operates with competence, timeliness, and transparency. Respect for the environment and for the customer are SOITAAB IMPIANTI SRL's primary commitments.

For these reasons, undertaking the process of obtaining certification for its Environmental Management System in accordance with the **UNI EN ISO 14001:2015 standard** represents a logical step for SOITAAB IMPIANTI SRL, aimed at obtaining recognition for the attention paid daily to tackling activities with safer operating methods, in order to prevent environmental impacts and protect the health of workers and the environment.

This commitment is required of all workers, as responsibility for environmental management extends to the entire company organization, from management to each individual worker, each according to their respective responsibilities and skills. This includes all those who work on behalf of SOITAAB IMPIANTI SRL, visitors, or other collaborators who access operating sites, who are informed and aware of the commitments undertaken by SOITAAB IMPIANTI SRL, including through this policy distributed to them.

SOITAAB IMPIANTI SRL prioritizes compliance with legislation and all environmental requirements in the execution of its activities, maintaining as its primary objective the limitation of environmental impacts and the prevention of workplace accidents and the occurrence of occupational diseases.

Having implemented an Environmental Management System, in addition to the Quality Management System, implies SOITAAB IMPIANTI SRL 'S COMMITMENT to continuous improvement, to design and execute its activities with environmental management in mind, to define, periodically review and disseminate policies, objectives and targets by which to measure the achievement of what has been undertaken and to consider the environment and its results as an integral part of company management.

Staff training and education, as well as worker involvement and participation in the Environmental Management System, are considered fundamental tools for raising awareness and focusing everyone's attention on issues that are part of daily commitment.

On the other hand, the human and instrumental resources needed to work with respect for the environment will always be adequate to support the high level of professionalism that characterizes our products and our interventions.

SOITAAB IMPIANTI SRL has deemed it appropriate to establish a system that guarantees respect for the environment and is committed to:

- Introduce and maintain an active management system in accordance with ISO 14001:2015 aimed at continuous improvement of the environmental management system;
- Prevent pollution and protect natural resources;
- Make all staff accountable for the quality of their work and the need to pursue continuous improvement of the Environmental Management System;

ENVIRONMENTAL POLICY

Reference Standard
UNI EN ISO 14001:2015

Ed. 00 Rev. 00
of 01/07/2024

Page 2 of 2

- Raise awareness among Department Managers to ensure the application of the Company Policy and the maintenance of the Environmental Management System at full efficiency;
- Optimize the use of energy resources.

The Management of SOITAAB IMPIANTI SRL is committed to ensuring that the company policy and objectives set out above are understood, implemented, and supported at all levels of the company.

The Management of SOITAAB IMPIANTI SRL has the following objectives:

- Respect the environment by ensuring the prevention of pollution in all its matrices (air, water, soil and subsoil) also taking into consideration the internal and external impacts on Global Climate Change.
- Pursue, through monitoring, technological improvement and staff awareness, the optimal use of energy resources;
- Involve your suppliers of goods and services in the common goal of environmental improvement;
- Provide the necessary and adequate human and material resources, encouraging dialogue with stakeholders, particularly employees, to better understand the environmental impacts and risks associated with their production activities.
